PROJECT
**Business Website — Build,
Launch & Care**

ISSUED
25 September 2026

A NOTE FROM OUR FOUNDER

"You didn't just hire a developer. You brought on a team that treats your launch like its own."

Dear Client,

Thank you for choosing OBD AI Solutions. Your website has already been built from the material you shared with us, and the next step is getting it live on your own domain, with professional email and the security a modern business needs.

The same engineering discipline goes into your project that we bring to the international teams we work with in the United States and Australia: documented decisions, clean handovers, and no surprises. This pack sets out how we work, what we need from you, and what you can expect from us at each step.

Please go through it at your convenience. If something is unclear, ask. A launch works best when both sides know exactly what is happening.

Warm regards,

Omer Bin Dawood

CEO & Founder, OBD AI Solutions
AI Engineer, DevNeuron (CA, USA)

Registered in your name, with your contact details.

Hosting

Account and billing in your name, paid directly to the provider.

Email

Mailboxes on your domain, passwords set by and for you.

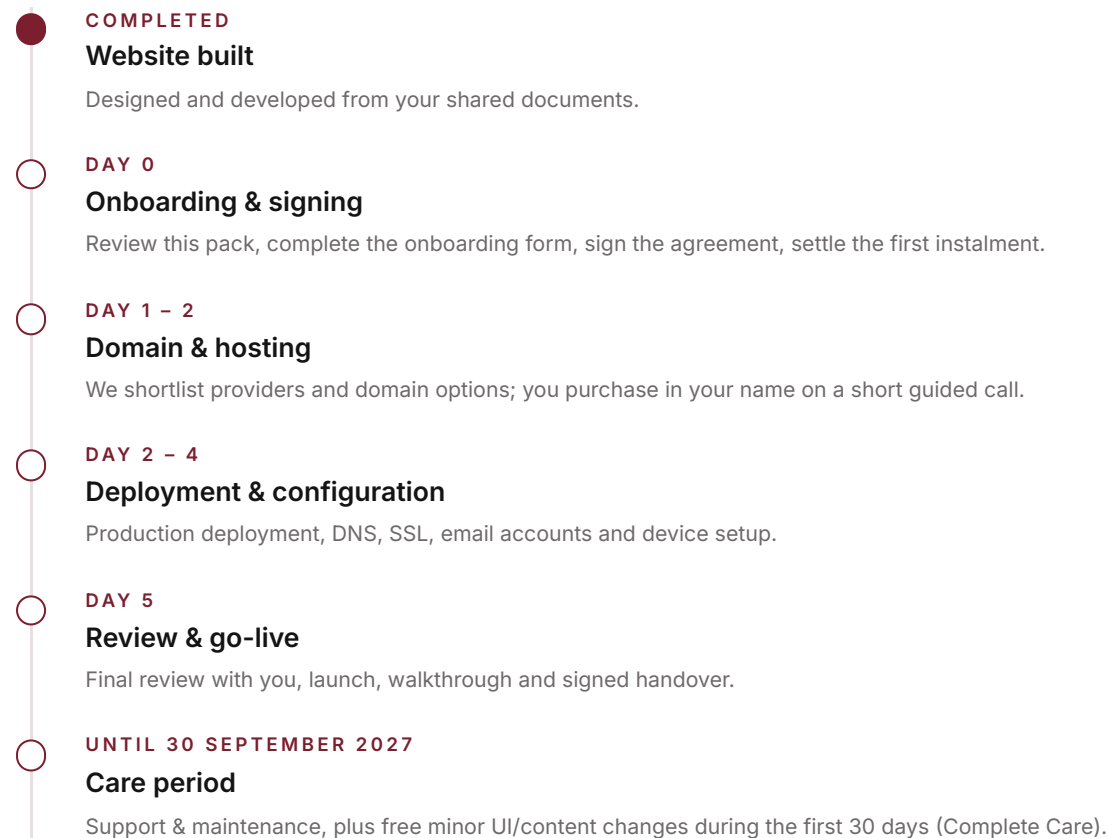

Access

We use delegated access for setup only. You can revoke it at any time.

A short, predictable path from signed agreement to a live website, with a clear owner for every step.

Timelines are in working days and depend on timely domain/hosting purchase and content approvals from your side.

HTTPS on every page, SSL auto-renewal, admin access locked to you.

Responsive

Checked on mobile, tablet and desktop across major browsers.

Fast

Image and asset optimisation, page-speed review before launch.

Deliverable email

SPF, DKIM and DMARC records so your emails reach inboxes, not spam.

Links, forms and contact channels verified end to end.

Handed over

Credentials, a site backup and a walkthrough, all signed off in writing.
